- Feedback: Feedback, AnalyticsReport
- Support: NotificationService, Report

Virtual Healthcare System (VHS) - 3-Tier Architecture

Legend

Color Coding:
Presentation Tier — User Interfaces (Web & Mobile)
Application Tier — Business Logic & Core Services
Data Tier — Persistent Storage & Repositories

Principles:

- One-way data flow (top → bottom)
- Secure REST-based communication
- Role-based access control
- Cloud-backed resilience & recovery

Architectural Principle:

- All data flows are *uni-directional* to preserve encapsulation, modularity, and maintainability.
